Individual Exam

Please read each problem carefully. After working the problem, select the correct answer from the five choices and mark that answer on your scantron. In the event of a tie (for individual awards), the following starred (*) test items will serve as tie breakers in the order listed: 5, 7, 9, 12, 13, 21, 26, 29, and 30. There is no correction factor for guessing and any question left blank will be scored as incorrect. You will have 50 minutes to complete the exam. The scantron sheet is machine graded so be sure to use the provided #2 pencil and if you need to change an answer, erase your former selection completely.
